Sales used in this analysis: All sales of one to three unit residences on residential lots which were verified as, or appeared to be market sales were considered for the analysis. Individual sales that were excluded are listed later in this report. Multi-parcel sales, multi-building sales, mobile home sales, and sales of new construction where less than a 100% complete house was assessed for 2004 or any existing residence where the data for 2004 is significantly different from the data for 2005 due to remodeling were also excluded. In addition, the summary above excludes sales of parcels that had improvement value of \$10,000 or less posted for the 2004 Assessment Roll. This also excludes previously vacant and destroyed property partial value accounts.

Population - Improved Parcel Summary:

	Land	Imps	Total
2004 Value	\$229,800	\$264,500	\$494,300
2005 Value	\$248,900	\$287,000	\$535,900
Percent Change	+8.3%	+8.5%	+8.4%

Number of one to three unit residences in the Population: 6061

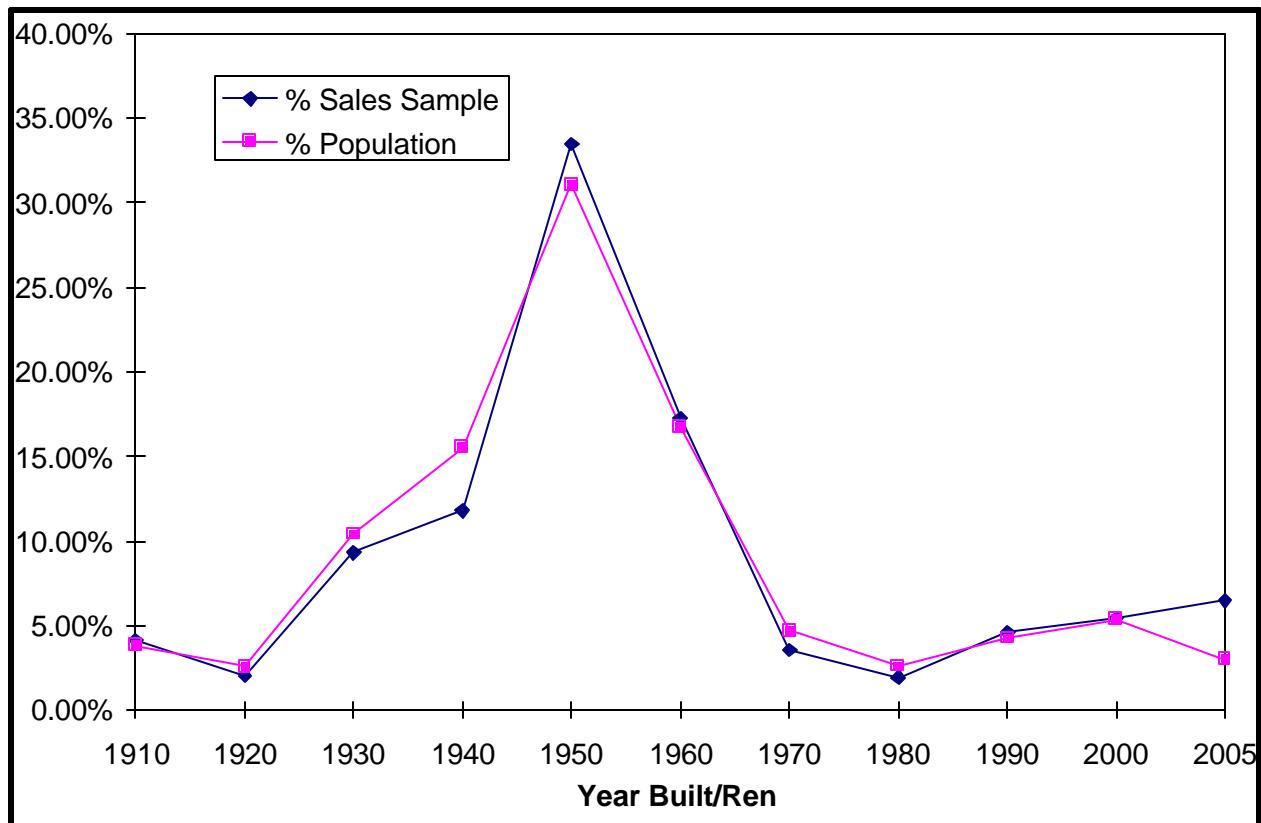

Summary of Findings: The analysis for this area consisted of a general review of applicable characteristics such as grade, age, condition, stories, living area, views, waterfront, lot size, land problems and neighborhoods. The analysis results precluded adjustments by the various categories. A single adjustment is applied to all improved properties in the area. Taking into account the variables per IAAO, this adjustment will improve assessment levels.

The Annual Update Values described in this report improve assessment levels. The recommendation is to post those values for the 2005 assessment roll.

Annual Update Process

Data Utilized

Available sales closed from 1/1/2003 through 11/2004 were considered in this analysis. The sales and population data were extracted from the King County Assessor's residential database. Additional studies were performed February 28th, 2005 to test the resultant assessment level using later 2004 sales. There were 48 additional useable improved sales. The weighted mean ratio dropped from 0.987 to 0.981 for one to three unit residences. These changes are not considered significant.

Sales Screening for Improved Parcel Analysis

Improved residential sales removal occurred for parcels meeting the following criteria:

1. Commercially zoned parcels
2. Vacant parcels
3. Mobile home parcels
4. Multi-parcel or multi-building sales
5. New construction where less than a 100% complete house was assessed for 2004
6. Existing residences where the data for 2004 is significantly different than the data for 2005 due to remodeling
7. Parcels with improvements value, but no building characteristics
8. Others as identified in the sales deleted list

See the attached Improved Sales Used in this Annual Update Analysis and Improved Sales Removed from this Annual Update Analysis at the end of this report for more detailed information.

Land update

A scarcity of vacant land sales (3 useable land sales) in area 11 made it problematic to develop adjustments to previous land value based on land sales alone. In the absence of evidence to the contrary, the same overall market increase indicated for improved properties is assumed to apply to previous land value. The following formula will be applied to all land:

The formula is:

2005 Land Value = 2004 Land Value * 1.085, with the result rounded down to the next \$1,000.

Improved Parcel Update

The analysis for this area consisted of a general review of applicable characteristics such as grade, age, condition, stories, living areas, views, waterfront, lot size, land problems and neighborhoods. Upon completion of the initial review, characteristics that indicated an area of possible adjustment were further analyzed using NCSS Statistical Software diagnostic and regression tools in conjunction with Microsoft Excel.

With the exception of real property mobile home parcels & parcels with "accessory only" improvements, the total assessed values on all improved parcels were based on the analysis of the 678 usable residential sales in the area. Based upon these useable improved property sales, and their 2004 Assessment Year assessed values, an overall market adjustment was derived.

Improved Parcel Update (continued)

The analysis for this area consisted of a general review of applicable characteristics which might be used in the model such as grade, age, condition, stories, living areas, lot size and neighborhoods. However, analysis of the sales and these characteristics precluded adjustments by various categories. A single adjustment is applied to all improved properties in the area. Taking into account the variables per IAAO, this adjustment will improve assessment levels.

The derived adjustment formula is:

$$2005 \text{ Total Value} = 2004 \text{ Total Value} * 1.085$$

The resulting total value is rounded down to the next \$1,000, *then*:

$$2005 \text{ Improvements Value} = 2005 \text{ Total Value} \text{ minus } 2005 \text{ Land Value}$$

An explanatory adjustment table is included in this report.

- Other:
- *If multiple houses exist on a parcel, the Improvement % Change indicated by the sales sample is used to arrive at new total value (2004 Land Value + Previous Improvement Value * 1.085)
 - *If a house and mobile home exist, the formula derived from the house is used to arrive at new total value.
 - *If “accessory improvements only”, the Improvement % Change as indicated by the sales sample is used to arrive at a new total value. (2004 Land Value + Previous Improvement Value *1.085).
 - *If vacant parcels (no improvement value) only the land adjustment applies.
 - *If land or improvement values are \$10,000 or less, there is no change from previous value. (Previous Land value * 1.00 Or Previous Improvement value * 1.00)
 - *If a parcel is coded “non-perc” (sewer system=3), there is no change from previous land value.
 - *If a parcel is coded sewer system public restricted, or water district private restricted, or water district public restricted, there is no change from previous land value.
 - *If an improvement is coded “% net condition” or is in “poor” condition, there is no change from previous improvement value (only the land adjustment applies).
- (2005 Total Value = (2004 Land Value *1.085) + (2004 Improvement Value * 1.00)
- *Residential properties located on commercially zoned land will be valued using the overall basic adjustment indicated by the sales sample.

Mobile Home Update

There are no mobile homes in this area.

Model Validation

“Before and After” comparison graphs appear earlier in this report.

Area 11 Annual Update Model Adjustments

2005 Total Value = 2004 Total Value + Overall +/- Characteristic Adjustments as Apply Below

Due to rounding of the coefficient values used to develop the percentages and further rounding of the percentages in this table, the results you will obtain are an approximation of adjustment achieved in production.

Overall (if no other adjustments apply)

8.50%

Comments

The % adjustment shown is what would be applied to all improved parcels.

For instance, all parcels receive an overall 8.5% upward adjustment.

Generally, there were no corrections for different strata.

100% of the population of 1 to 3 family home parcels in the area are adjusted by the overall alone.

Area 11 Annual Update Ratio Confidence Intervals

These tables represent the percentage changes for specific characteristics.

A 2005 LOWER 95% C.L. greater than the overall weighted mean indicates that assessment levels may be relatively high. A 2005 UPPER 95% C.L. less than the overall weighted mean indicates that assessment levels may be relatively low. The overall 2005 weighted mean is 0.987.

The confidence interval for the arithmetic mean is used as an estimate for the weighted mean.

It is difficult to draw valid conclusions when the sales count is low.

The above list of sales was considered. Due to the fact there are an insufficient number of vacant sales to develop a land valuation model, the overall factor applied to improved properties is assumed to apply to land.

MEMORANDUM

DATE: January 12, 2005

TO: Residential Appraisers
FROM: Scott Noble, Assessor
SUBJECT: 2005 Revaluation for 2006 Tax Roll

The King County Assessor, as elected representative of the people of King County, is your client for the mass appraisal and summary report. The King County Department of Assessments subscribes to the Uniform Standards of Professional Appraisal Practice 2005. You will perform your appraisals and complete your summary mass appraisal reports in compliance with USPAP 2005. The following are your appraisal instructions and conditions:

1. You are to timely appraise the area or properties assigned to you by the revalue plan. The Departure Provision of USPAP may be invoked as necessary including special limiting conditions to complete the Revalue Plan.
2. You are to use all appropriate mass appraisal techniques as stated in USPAP, Washington State Law; Washington State Administrative Code, IAAO texts or classes.
3. The standard for validation models is the standard as delineated by IAAO in their Standard on Ratio Studies (approved 1999); and
4. Any and all other standards as published by the IAAO.
5. Appraise land as if vacant and available for development to its highest and best use. The improvements are to be valued at their contribution to the total.
6. You must complete the revalue in compliance with all Washington and King County laws, codes and with due consideration of Department of Revenue guidelines. The Jurisdictional Exception is to be invoked in case USPAP does not agree with these public policies.

7. Physical inspections should be completed per the revaluation plan and statistical updates completed on the remainder of the properties as appropriate.
8. You must complete a written, summary, mass appraisal report for each area and a statistical update report in compliance with USPAP Standard 6.
9. All sales of land and improved properties should be validated as correct and verified with participants as necessary.
10. You must use at least two years of sales. No adjustments to sales prices shall be made to avoid any possibility of speculative market conditions skewing the basis for taxation.
11. Continue to review dollar per square foot as a check and balance to assessment value.
12. The intended use of the appraisal and report is the administration of ad valorem property taxation.
13. The intended users include the Assessor, Board of Equalization, Board of Tax Appeals, King County Prosecutor and Department of Revenue.
14. The land abstraction method should have limited use and only when the market indicates improved sales in a neighborhood are to acquire land only. The market will show this when a clear majority of purchased houses are demolished or remodeled by the new owner.
15. If "tear downs" are over 50% of improved sales in a neighborhood, they may be considered as an adjustment to the benchmark vacant sales. In analyzing a "tear down" ensure that you have accounted for any possible building value.
